

Hassan Raza

Full Stack Developer | Django | React | Python | Scraping

hassan.r410@outlook.com | github.com/HassanR24 | linkedin.com/in/hassanr410/

Full-Stack Python Developer with expertise in Django, React, Next.js, and Tailwind CSS. Skilled in building scalable web applications, automating data workflows, and deploying production-ready solutions on Linux and cloud environments. Combines five years of analytical experience from accounting with modern development practices to deliver clean, efficient, and business-focused software.

Professional Experience

Full Stack Developer - Django | React | ThunderMind Tech | 05/2025 - Present

- Built and deployed 10+ web scrapers and automation tools on Linux servers to process large-scale datasets.
- Converted Figma designs into production-ready MVPs using Django, React, Next.js, Tailwind CSS, HeroUI, and third-party APIs.
- Delivered a scalable Django REST API and responsive React interface for bimmerportal.xyz.
- Worked on a product that extracts products from 25+ websites and stores structured objects in Supabase.

Python Developer | Programmers Force | 09/2024 - 04/2025

- Designed and maintained ETL pipelines that processed millions of records.
- Implemented client-requested features in Python and PHP (Laravel).
- Received the Excellent Performance Award in December 2024.

Python Developer | Enlatics | 03/2023 - 08/2024

- Built a task management web app with Django REST Framework.
- Integrated Celery and Celery Beat for scheduled tasks, reducing manual workload by 30%.
- Managed secure asset storage on Google Cloud Platform and coordinated smooth API integration.

Associate Web Scraper | Enlatics | 09/2023 - 02/2024

- Developed high-volume web scrapers using BeautifulSoup and Selenium for a KYB project.
- Improved scraper efficiency and data accuracy through refactoring, testing, and tuning.

Skills

- Python, Django, FastAPI, Django REST Framework, Celery, Redis, PostgreSQL
- React, Next.js, TypeScript, Tailwind CSS, HeroUI, Formik
- Scrapy, Playwright, Selenium, Requests, BeautifulSoup, Linux, Docker
- GitHub Actions, Testing, Task planning, Mentoring, Production support

Certificates

- Python - 100 Days Of Code, Udemy
- Complete JavaScript Course, Udemy
- React - The Complete Guide, Udemy

Interests

- Exploring new tech stacks and testing frameworks, tools, and libraries.
- Tech content and learning through coding sessions, tutorials, and industry trends.
